DBMS LAB PROGRAM – 2

2.BOOK DEALER DATABASE

QUESTION :

The following tables are maintained by a book dealer:

AUTHOR(author-id: int, name: String, city: String, country: String)

PUBLISHER(publisher-id: int, name: String, city: String, country: String)

CATALOG(book-id: int, title: String, author-id: int, publisher-id: int, category-id: int, year: int, price: int)

CATEGORY(category-id: int, description: String)

ORDER-DETAILS(order-no: int, book-id: int, quantity: int)

- i) Create the above tables by properly specifying the primary keys and the foreign keys.
- ii) Enter at least five tuples for each relation.
- iii) Give the details of the authors who have 2 or more books in the catalog and the price of the books in the catalog and the year of publication is after 2000.
- iv) Find the author of the book which has maximum sales.
- v) Demonstrate how you increase the price of books published by a specific publisher by 10%.

PROGRAM CODE :

```
create database bookdealer;
use bookdealer;
create table AUTHOR (
author_id int,
name varchar(20),
city varchar(15),
country varchar(15),
primary key(author_id)
);
show tables;
desc AUTHOR;
SELECT *FROM AUTHOR;
create table PUBLISHER (
publisher_id int,
```

```
